Senior Technical Writer · Documentation Architect · Developer Experience

A senior technical writer with 20+ years of experience delivering hardware, software, and API documentation for global engineering teams. Specializes in docs-as-code workflows, structured content systems, developer tooling, and AI-assisted documentation automation. Combines deep writing expertise with hands-on technical skills in Python, RAG pipelines, semantic authoring, and content architecture.

Core Competencies

- **Technical Writing & Content Architecture:** API documentation, hardware/software manuals, reference guides, training, white papers, developer onboarding
- **Docs-as-Code & Tooling:** GitHub, Markdown, Sphinx, RST, Docker, Linux, CI/CD documentation workflows
- **Structured Content Systems:** DITA, Tridion Docs, XMetaL, FrameMaker (Structured/Unstructured), XML, semantic authoring
- **AI & Automation:** Python, Retrieval-Augmented Generation (RAG), Claude, Slack bot development, embeddings search, ExtendScripts, Power Automate
- **Collaboration Platforms:** Jira, Confluence, SharePoint, Teams, Slack, Jama, Microsoft 365
- **Illustration & Media:** Visio, WaveDrom, SnagIt, Captivate, Audacity

Professional Experience

Manager, Publications — Intellicheck (Remote)

June 2023 – July 2026

- Led Intellicheck's first **docs-as-code** initiative using GitHub, Markdown, and [Readme.io](https://readme.io) to modernize developer documentation workflows.
- Designed and built ROOTS, a Slack-integrated **retrieval-augmented generation (RAG)** Python application using Claude to answer developer questions about API endpoints and internal functionality.
 - Implemented retrieval pipelines over GitHub API documentation and internal FAQs.
 - Delivered an authoritative internal support tool that reduced SME interruptions and accelerated developer onboarding.
- Converted legacy API documentation from Word to Markdown, improving clarity, consistency, and maintainability.
- Migrated publications to a semantic XML + Markdown authoring platform to produce single-sourced WebHelp output.
- Built Confluence spaces for onboarding, technical publications best practices, and internal communication.
- Analyzed and reorganized SharePoint sites across business units, simplifying permissions and implementing Power Automate workflows.
- Designed a Jira work management project with Slack release notifications to streamline publication workflows.

Jason Langkamer-Smith

Technical Writer — Intel, Allentown, PA

July 2014 – April 2023

- Delivered **700+ publications** for electrical engineers, developers, and SMEs across semiconductor and architecture teams.
 - Authored structured content in an enterprise CCMS using **DITA, Tridion Docs, and XMetaL**.
 - Established a **docs-as-code workflow** using Linux, Gerrit, Sphinx, Docker, and RST to revise instruction set reference manuals.
 - Designed diagrams and illustrations for architecture documents, including logical flows, sequences, waveforms, and circuit block diagrams.
 - Managed shared reviews with Adobe Acrobat and Word, implementing thousands of contributor comments.
 - Delivered training on grammar, style, templates, SharePoint, Microsoft 365 co-authoring, automation, and reporting.
 - Released documents through a Salesforce + Adobe AEM CMS supporting customer entitlements and lifecycle processing.
-

Senior Technical Writer — Avago Technologies (Broadcom), Allentown, PA

July 2011 – July 2014

- Documented integrated circuits for the storage industry by interviewing SMEs and analyzing design documents.
 - Developed custom **FrameMaker ExtendScripts** to automate complex documentation build processes, improving quality and reducing production time.
-

Technical Writer — Innovative Control Systems, Wind Gap, PA

May 2007 – July 2011

- Authored 40+ manuals, requirements specifications, technical briefs, installation guides, quick references, and brochures.
 - Developed online training using Adobe Captivate for point-of-sale cash management software.
-

Applications Support Specialist — Agere Systems (LSI Logic), Allentown, PA

November 2000 – December 2005

- Reviewed and revised detailed integrated circuit specifications, improving templates, drawings, indexes, and workflows.
-

Education

New Jersey Institute of Technology — Master's Degree (Summa Cum Laude)

Professional & Technical Communications

Indiana University of Pennsylvania — Bachelor's Degree

Journalism Major · Computer Science Minor

Memberships

Member & Volunteer — Society for Technical Communications (STC), Philadelphia Metro Chapter

Training

Creating API Documentation — LinkedIn Learning Certificate
